MOTORPARTS è da sempre garanzia di affidabilità e innovazione nella progettazione di parti speciali, ricambi e accessori per le due ruote. L'azienda nasce nel 1965 come distributore di ricambi originali; è negli anni '90 che la Motorparts all'attività di distribuzione ricambi, affianca quella di progettazione di parti speciali. Entra così nel mondo delle gare su scooter con il marchio Top Performances. La volontà di soddisfare il cliente a 360° gradi è da allora rimasta intatta e la gamma di prodotti si è via via arricchita mantenendo i valori della tradizione di qualità e serietà.

Oggi la **MOTORPARTS** compie un ulteriore passo in avanti nella propria evoluzione creando il Marchio **MPH** "Motor Parts Helmets" con un contenuto di tecnologia ed innovazione di alto livello, realizzato dal Team R&D e da Professionisti del Settore, conservando lo stile e l'immagine dell'Azienda. Una gamma di Caschi focalizzata sulla Sicurezza e Praticità di utilizzo quotidiana, coniugati ad alta tecnologia e funzionalità. Uno sguardo verso il Futuro con le basi solide nella Storia del Brand.

MOTORPARTS has always been a guarantee of reliability and innovation in the design of special parts, spare parts and accessories for two wheels. The company was founded in 1965 as a distributor of original spare parts; In the 90s Motorparts combined the spare parts distribution business with the design of special parts. Thus enters the world of scooter racing with the Top Performances brand. Since that day the desire to satisfy the Client's need at 360 ° has been maintained and the range of products was further extended preserving the typical values of Motorparts tradition quality and reliability.

Today **MOTORPARTS** takes a further step forward in its evolution by creating the **MPH** "Motor Parts Helmets" ensuring a high level of technology and innovation, handled by the R&D Team and by Professionals in the sector, still retaining the style and image of the Company. A range of helmets focused on safety and practicality required in everyday use, combined on high functionality and technology. A forward-looking rests on the solid foundations of the brand's history.

ROO

COMFORT LINER

All MPH liners are fully removable and washable. We use hypoallergenic technical fabrics that wick moisture to help you to stay cool while you ride.

EMERGENCY PULLER

This puller allows to remove the cheek pads from the helmet, allowing extra space to remove the helmet with minimal movement of a fallen rider's head and neck.

AIR FLOW SYSTEM

MPH helmets feature a Dynamic Flow-through Ventilation. Fully adjustable intake ports and vented EPS work with the rear spoiler and exhaust ports to create a constant, light flow of air helping to keep the rider cool and comfortable.

DOUBLE D RING

This model uses a classic double D-ring buckle system for a secure fit. Slide the strap through BOTH D-rings, and then wrap it over the first and through the second. Pull the strap until you have a snug fit that won't roll off.

AERODYNAMICS

The shape of the shell and ventilation ports helps to maintain stability while driving and to renew the air inside the helmet efficiently.

SUN VISOR ACTIVATION

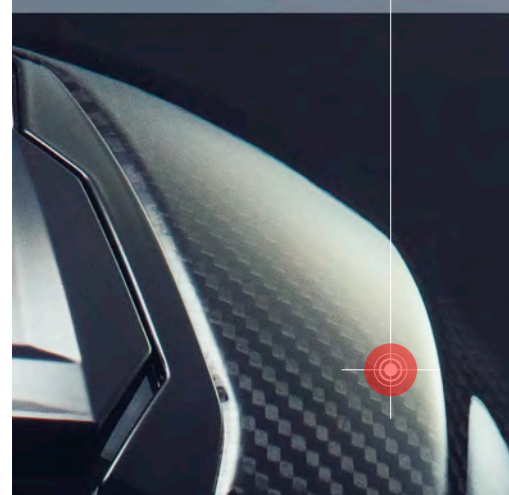

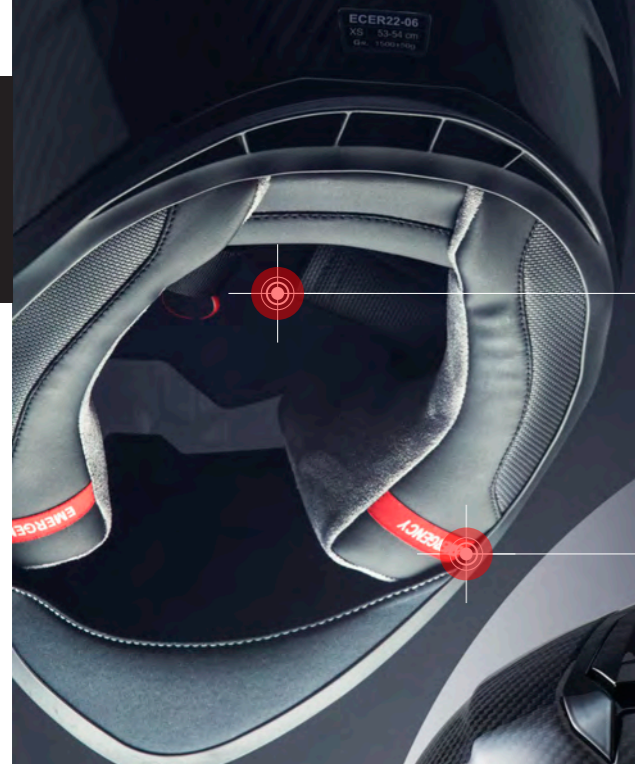

The sun visor moves up and out of the way quickly with the exclusive fast to flip-up system that is allocated in the lateral of the helmet.

HIGH DEFINITION VISION

MPH visors are produced with polycarbonate with high resistance to impact that avoids distortion and offers maximum clarity. The visors are durable, scratch resistant and UV resistant. All of that combined with the ultimate technology of **PINLOCK** system offers the most advance features in fog resistant.

JCT JAPAN CARBON TECHNOLOGY

A carefully layered blend of carbon weave pre-impregnated with resin makes a strong, ultra lightweight, but rigid shell.
