

**TPR FACTORY RACING CLUTCH 5 SPRINGS  
FOR AM ENGINES**

**REF. 99F5MAM10**

**APPLICATIONS:**

All Minarelli  
AM; AM3, AM4,  
AM5, AM6, first and  
second series.

Made from high quality 6082 Anticorodal Alloy the TPR FACTORY clutch is completely machined from billet on CNC machining centres with anti-corrosive Anodic oxidation treatment and comes with the components necessary to mount it on all vehicles equipped with AM 3-4-5-6 engines. The use of 1 coated plate, 1 steel plate and an extra spring compared to the original allows a 25% larger contact surface of the friction material, combined with a better distribution of the specific pressure thanks to the use of the 5 springs.

Availability: april 2021
